Butterfly valves

Double eccentric HD Series

BVPD - Wafer BLPD - Lug **DN 80 - 600 • 3" - 24"**

Soft seated butterfly valves
P max: **10 Bar** designed for low pressures and powder convey

BVKI - Wafer BLKI - Lug **DN 40 - 800 • 1" 1/4 - 32"**

Soft seated butterfly valves
P max: **16 Bar** designed for all applications

BFKI - double flange **DN 80 - 600 • 3" - 24"**

Soft seated butterfly valves
P max: **16 Bar** double flanged

BVKA - Wafer BLKA - Lug **DN 40 - 800 • 1" 1/4 - 32"**

Soft seated butterfly valves
P max: **20 Bar**

BVKX - Wafer BLKX - Lug **DN 50 - 250 • 2" - 10"**

Soft seated butterfly valves
P max: **25 Bar**

GIBSON Soft seated butterfly valves are designed to meet with most industrial applications, from powder conveyance to petrochemical requirements.

The valves are manufactured in four different versions with sizes from DN 40 to DN 800, pressures up to 25 bar and many different materials.

We can supply valves

- manually operated (with levers or gearboxes)
- pneumatically operated (with double or single acting actuators)
- electrically or hydraulically operated

We also offer special solutions in many different materials.

Wide range of elastomers

A very wide range of elastomers allows the best combination of materials depending on the different applications

Detail of shaft-disc connection

Valves over DN300 have a special designed shaft-disc connection which ensures a strong coupling while avoiding clearances and gives higher shaft tensile capacity thanks to the section considerably larger than the classic square section.

Special shaft double packing

Sealing outwards is ensured by a double packing at the top and at the bottom of the shaft.

Detail of lower support

The adjustable lower support prevents the shaft-disc unit to move along the axis. Furthermore when the valve is assembled with vertical shaft, the disc does not weigh on the seat with a longer duration of valve life.

All GIBSON butterfly valves have anti-blow out system for the shafts in compliance with EN736 and API609 standards

Detail of shaft-disc fastening

For valves over DN500 this solution allows a strong fastening without clearances and easy maintenance.

Detail of replaceable body seat

Its shape ensures the best anchoring to the body even in hard applications.

Butterfly valves

SOFT SEATED

Ghibson soft seated butterfly valves (PD, KI, KA and KX series) are designed to fit in industrial applications from powder conveyance to marine and petrochemical requirements.

They are manufactured in different versions and materials and for working pressures from 6 to 25 Bars.

Head losses

NOTES: values indicated in this page is only for information

Formulae for calculation of rate flow

Liquids:
$$Q = \frac{KV}{\sqrt{\frac{PS}{\Delta P}}}$$

Q rate of flow (m³/h)
PS specific gravity (water=1)
ΔP pressure drop (bar)

Gas:
$$Q = 28.5 \frac{KV}{\sqrt{\frac{PS}{P_2 \cdot \Delta P}}}$$

Q rate of flow (m³/h)
PS specific gravity (air=1)
ΔP pressure drop (bar)
(less than 1/2 inlet pressure)
P₂ outlet pressure

Steam:
$$Q = 22.5 \cdot KV \cdot \sqrt{P_2 \cdot \Delta P}$$

Q rate of flow (Kg/h)
ΔP pressure drop (bar)
(less than 1/2 inlet pressure)
P₂ outlet pressure

Calculation of the rate of flow equivalent to H2O

$$Q_e = Q \sqrt{\frac{d}{1000}}$$

For different liquid, gas or steam head losses are determined by equivalent water of flow, as follows:

Q_e equivalent water flow (mc/l o l/s)
Q fluid flow (mc/l o l/s)
d fluid specific gravity (Kg/mc)

Values KV (CV = 1,16 KV)

NOTE 1 Screw and rod dimensions have been calculated with WELDING NECK flanges PN 6/10/16 (EN1092-1 Type 11) ANSI150 (ANSI B16.5)

NOTE 2 Number of nuts should be double when WAFER valves are assembled with threaded rods.

DN	40	50	65	80	100	125	150	200	250	300	350	400	450	500	600	700	800

Installation

Assembly

1 - Leave a space between flanges so that valve can be easily inserted and removed.

2 - Open completely the valve before tightening flanges.

3 - Tighten bolts till flanges are in contact with valve body.

!
4 - **NOTE:**
do not insert other packing between flange and valve.

NOTE: Weld the pipe only in spots with the valve between flanges. Remove the valve before finishing welding to avoid that heat damage the seat. Clean carefully the welding to avoid that slags damage the seat.

Installation for powders and muddy fluids

In case of use with powders or muddy fluids, install the valve with horizontal rotation axis, to allow sediments to flow easily on opening.

Wrong
Vertical rotation axis

←
powders or muddy fluids

Right
Horizontal rotation axis

←
powders or muddy fluids

This type of installation is always advisable with valve diameters over DN 400.

End piping installation

When valves are installed end of piping, a counterflange as per dwg type B is needed to secure tightness at max pressure.

Type A installation without counterflange

Type B installation with counterflange

valve type	P _{max} (Bar)	
	type A inst.	type B inst.

Pneumatic actuator SR / SPRING RETURN

Rack & Pinion Actuators - MTS

Max air pressure: 10 bar Double travel stop
 Temperature: -20°C / +80°C open/close: ±10°
 Torque range: 31/3564 Nm

Scotch Yoke Actuators - CHD Series

Max air pressure: 6 bar Nmt
 Temperature: -20 / +80°C Double travel stop
 Torque Range: 1200/305000 open/close: ±6°

valve seat: EPDM/NBR fluid: H₂O T: 20°C operating air pressure: ≥5.5 bar

Emergency lever only MT10÷MT50 double acting

Hydraulic actuators ARES

- Technical features:
 - » ductile iron cast body
 - » steel rack and pinion
 - » NBR seats
- fluid material:
 - » hydraulic oil type : HPL DIN51524-2 / ISO 6743-4. Viscosity 15/200 cst
- working pressure: 10 - 120 bar
- working temperature: -20°C / +80°C

Compact design, 90° rotation ±5°,
Travel adjustment in both direction
of rotation, Flange ISO 5211,
Double or single acting with spring return

MORE THAN 35 YEARS OF HIGH QUALITY EXPERIENCE

Ghibson Italia can now boast of more than 35 years of experience in manufacturing of industrial valves.

In these 30 years we have designed and manufactured in our facilities in Italy butterfly valves and check valves, for the most different industrial applications.

We export our products all over the world always providing our customers with the best assistance during all the phases: design, installation, maintenance.

MARKET SEGMENTS

Marine
Water Treatment
Pulp & Paper
Power Plant
Nuclear Plant
HVAC
Chemical & Petrochemical
Powder Conveying Systems
Food & Beverage

APPLICATIONS

Steam isolation - Vacuum service - Refining
Cooling Water systems - Metallurgical processes
Powder transportation & storage
Oil field recovery - Liquid natural gas
Steam service - Steam Turbine
Saltwater Service - District heating & cooling
Hot Air & Smokes
Chemicals storage & transportation
Food & Beverage processes

DEPARTMENTS

- RESEARCH & DEVELOPMENT
- DESIGN
- CUSTOMIZATION
- PRODUCTION & LOGISTIC
- SALES & MARKETING
- QUALITY CONTROL
- CERTIFICATIONS
- PACKING AND SHIPPING
- AFTER SALES SUPPORT

WIDE RANGE OF PRODUCTS

Very large choice of materials including valves of every alloy of carbon or stainless steel, bronze, aluminium, as well as with PTFE or Polypropylene.

We manufacture rubber seated valves with many elastomer types (EPDM, NBR, FKM, Silicone, Carboxidate among others), as well as PTFE, RTFE seated valves with many different coatings such as Halar, Rilsan, PFA, Chenisil, etc.

We can offer a total assistance:

- before selling we can start from dimensioning the valves and actuators, make selection of materials for all parts upon knowing the specification, prepare all types of drawings etc.
- after selling we make final documentation, provide installation supervision, undertake commissioning etc.

BUTTERFLY VALVES

Rubber Seated
PTFE Seated
High Performance
Damper Valves

ACTUATORS & OPTIONS

Pneumatic - Electric - Hydraulic

CONTROL SYSTEMS

CUSTOMIZED VALVES

CHECK VALVES

Disc type
Swing type
Dual plate
